Nivedith P

(+91) 8157039907 | nivedithpallipurath@gmail.com | linkedin.com/in/nivedith-p | github.com/nivedithp | Kannur, Kerala, India

MCA student and aspiring AI / Python Developer with hands-on experience building end-to-end machine learning and computer vision applications; seeking an internship.

Projects

AI Digital Eye-Strain & Health Monitor | (Python, OpenCV, MediaPipe, Scikit-learn, Streamlit)

- Built a real-time computer vision system that monitors eye strain, posture, and fatigue from a webcam feed using MediaPipe Face Mesh and a Random Forest classifier.
- Features: Eye Aspect Ratio (EAR) blink detection, Normal / Mild / High fatigue prediction, live Streamlit dashboard, and voice alerts.

NovaShare – LAN File Transfer App | (Java, Swing, Socket Programming, Multithreading)

- Developed a peer-to-peer desktop app for multi-file transfer over a local network using TCP sockets and a Swing GUI.
- Features: Drag-and-drop file selection, real-time progress tracking, and live MB/s transfer speed.

Education

Master of Computer Applications (MCA) | 2025 – 2027 | SGPA (Sem 1): 8.1 / 10
Presidency University, Bangalore

Bachelor of Computer Applications (BCA) | 2022 – 2025
Morazha Co-operative Arts & Science College, Kannur University

Technical Skills

Languages: Python, Java, C, SQL

Frameworks & Libraries: Scikit-learn, OpenCV, MediaPipe, NumPy, Pandas, Streamlit

Core Expertise: Machine Learning, Computer Vision, Data Structures & Algorithms, Predictive Modeling, Generative AI Basics, Object-Oriented Programming, DBMS

Tools and Technologies: Git, GitHub, Jupyter Notebook, VS Code, IntelliJ IDEA

Certifications

- Machine Learning with Python – IBM (Coursera), 2026
- Python Data Structures – University of Michigan (Coursera), 2026
- Crash Course on Python – Google (Coursera), 2026
- Upcode AI Bootcamp (Python + AI) – Upcode Software Labs, 2025
